

# Land & Ship

Inbound & Outbound  
Part Management & Fulfillment

PGS provides logistics & fulfillment services that enable companies to operate on a global scale.

## Management & Fulfillment

### Value 1

PGS offers integrated part add-on services like Repack, Container Management, Washing, De-Rust, Sub Assembly, Gauging, Inspections, & Customer Support

We are a reliable partner for parts arriving in the U.S. from overseas to meet your Just-in-Time (JIT) delivery requirements. Operating beyond a traditional warehouse, we actively process your parts according to your end user's specifications. We offer repackaging services into your customers' returnable dunnage and oversee container management. Trust us to ensure your parts mirror the quality and experience of local sourcing. We are your one-stop solution for global Land & Ship needs.

### Value 2

Our Unload + Reload processes are paired with 15 impactful certifications that save your business time & money.

At our facility, we prioritize the protection and care of your parts to minimize any potential losses during transit. Our meticulous attention to detail and stringent quality control measures are aimed at enhancing the overall quality of your products. Additionally, our dedicated team works tirelessly to ensure that your items arrive at their destination looking their absolute best, presenting a positive impression to your end customers.

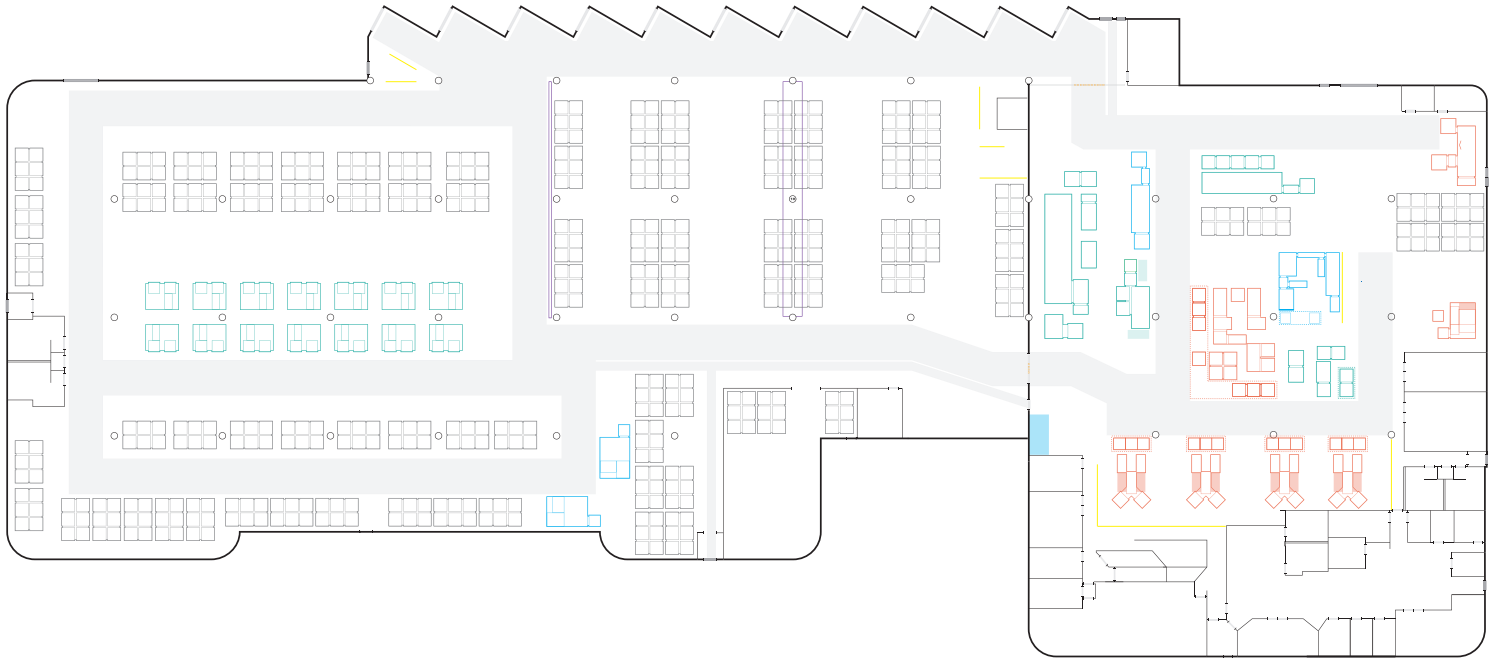

### Value 3

11 truckwells paired with countless square footage & 24/7 security monitoring means you can rest assured your products are safe & secure at PGS.

At PGS, we prioritize the safety and security of our customers' parts through state-of-the-art security systems, stringent handling procedures, advanced inventory management, and optimal storage conditions. Our commitment to ensuring the protection of your parts gives you peace of mind throughout their journey within our facility.
